

Coco Wood Lakes Association, Inc.

Home Paint Colors and Concrete Colors

The Architectural Committee, over several meetings, carefully considered many paint colors and schemes. They decided on those presented herein. Also, it was the consensus of the committee that the door color should be left to the choice of the owner, however, the door color **would still be subject to approval** from the ARC Committee. Please note that there should be at least two (2) and a maximum of three (3) colors selected for each home.

The colors contained on the SWA paint patches will no longer be valid as these were a mix of different paints being recycled.

There are colors from the major suppliers, Behr, PPG and Sherwin Williams. In fact, any paint dealer can match colors from any vendor.

Home painting is recommended (by most manufacturers) every eight to ten years with a pressure washing to be done mid-cycle.

Hurricane shutters and gutter/downspouts can only be white, ivory or dark brown.

In the area of concrete stain, it is mandated that any owner who is approved to apply concrete stain also must use the "shark grip slip resistant" additive in the concrete stain.
